

Electricity.

Lesson	Objective/s
Lesson 1	<ul style="list-style-type: none">• Review of previous knowledge• Mind map of current knowledge• Look at knowledge organiser and introduce new topic
Lesson 2	<ul style="list-style-type: none">• To investigate circuits and their different components.
Lesson 3	<ul style="list-style-type: none">• To investigate the differences between mains and battery powered circuits.
Lesson 4	<ul style="list-style-type: none">• To recognise some common conductors and insulators, and associate metals with being good conductors.
Lesson 5	<ul style="list-style-type: none">• To investigate the purposes of conducting and insulating materials.
Lesson 6	<ul style="list-style-type: none">• To be able to use knowledge of conductors and insulators to create switches to complete a circuit.
Lesson 7	<ul style="list-style-type: none">• To be able to plan and carry out an experiment to see how to change the brightness of a bulb.
Lesson 8 (assessed task)	<ul style="list-style-type: none">• Children to write a conclusion to their experiment about changing the brightness of a bulb.
