Animals including humans

Lesson	Objective/s
Pre learning assessment	• Complete pre learning assessment • Review of previous knowledge • Look at knowledge organiser and introduce new topic
Lesson 1	• Identify the different types of teeth in humans and their simple functions. • Setting up simple practical enquiries, comparative and fair tests.
Lesson 2	• Identify the different types of teeth in humans and their simple functions. • Reporting on findings from enquiries, • Using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions.
Lesson 3	• Describe the simple functions of the basic parts of the digestive system in humans • Read and spell scientific vocabulary
Lesson 4	• Describe the simple functions of the basic parts of the digestive system in humans. • Use straightforward scientific evidence to answer questions or to support their findings
Lesson 5	• Construct and interpret a variety of food chains, identifying producers, predators and prey • Gathering, recording, classifying and presenting data in a variety of ways to help in answering questions.
Lesson 6	• Construct and interpret a variety of food chains, identifying producers, predators and prey. • Identify differences, similarities or changes related to simple scientific ideas and processes. • Use straightforward scientific evidence to answer questions or to support their findings.
Post learning assessment	• Complete post learning assessment
