

Evolution and inheritance - Biology

Lesson	Objective/s
Pre assessment	<ul style="list-style-type: none">• Complete pre assessment quiz• Review previous knowledge.• Look at new knowledge organiser
Lesson 1	<ul style="list-style-type: none">• Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents.
Lesson 2	<ul style="list-style-type: none">• Identify how animals and plants are adapted to suit their environment in different ways.• Identifying and classifying
Lesson 3	<ul style="list-style-type: none">• Identify the key ideas of the theory of evolution.• Identifying scientific evidence that has been used to support or refute ideas or arguments.
Lesson 4	<ul style="list-style-type: none">• Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago• Identifying scientific evidence that has been used to support or refute ideas or arguments.
Lesson 5	<ul style="list-style-type: none">• Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago• Identifying scientific evidence that has been used to support or refute ideas or arguments
Lesson 6	<ul style="list-style-type: none">• Identify how adaptation may lead to evolution by examining the advantages and disadvantages of specific adaptations and the role of human intervention in the process of evolution
Post assessment	<ul style="list-style-type: none">• Complete post assessment quiz.
